Release Notes 2.1.4
June 13, 2004

The following items have been moved (migrated) to Production for use by Agencies beginning on June 13, 2004.

- A fix was applied to the allow users to enter PAR remarks to cancelled actions.

- An update to Recruit 52 report viewer to display requisitions based on the system date versus the requisition status date. In the past, users were not able to see requisitions if the effective date on the job code or position was less than the requisition status date. This update resolves this issue and allows users to accurately view requisitions and print requisition requests.

- An update was made to the Recruit 52 report viewer to allow users to select and add multiple requisitions for printing.

- An update was made to the allow users to access employee records when the employee's most effective dated row is a realignment that is in a 'Cancelled' WIP status.

- An update was made to the CIDB Long so that it selects appointment data for employee's whose employee record number zero is terminated. In addition, a change was made to pull valid appointment data for employees whose department information does not match between the employee record, job code table and position data record.

- The following online edits were added to EHRP:
  1. Resident Location Code should be mandatory, never blank. An update script was processed to populate 75% of missing records based on the employee's city and state. This leaves a remaining 10% of the HHS population with a missing resident location field. Information will be provided to the agencies with employees who are still missing the resident location code.
  2. If the NOA code for an action is 846, then Award Data Hours cannot exceed 40.
  3. If a position is a supervisory position, then bargaining unit must be 8888 and union code must be blank. (Supervisors cannot have a bargaining unit.)
  4. If a job code is a supervisory position, then bargaining unit must be 8888 and union code must be blank. (Supervisors cannot have a bargaining unit.)
  5. Year of degree must be greater than year of birth plus seventeen years.
  6. For educations levels 06, 10 and 13 or greater require a year of degree and a degree code is required. For all other education levels, year of degree and degree code cannot be entered into the system.

  - Par Action Audit Report – A custom report to identify actions processed by a single user either via one or multiple workflow roles.

EHRP Public Queries

Name	Purpose	Parameters	Data Provided
HE0248- Awards w/ Barg Unit and NOA	Request from SAMHSA needed for FY03 - Oct 1, 2002 - Sept 30, 2003.
